Profile	Highly-motivated computer science graduate with an interest in mobile application development, web development and search engine optimisation. I have published my own products to the market in the past.
Experience	<p>Mobile App Development Intern, Aviva; United Kingdom - June 2014-September 2014 I worked as a mobile app development intern at Aviva, one of the UK's largest insurance providers. There, I used Xamarin for cross platform development for iOS and Android.</p> <p>Founder, jRuston Apps; United Kingdom - 2012-Present I am the founder of jRuston Apps, an iOS and Android mobile app development company. It has several applications published, mainly in the "Travel" category.</p> <p>Founder, Xeromi.com; United Kingdom - 2010-2011 I was the founder of a web hosting review website until it was sold in July 2011 to a larger player in the industry.</p> <p>Founder, JR SEO Services; United Kingdom - 2009-2011 I was an SEO freelancer for approximately two years. I worked with both international firms as well as local UK businesses to increase their search engine rankings.</p> <p>Founder, MiloFi Hosting; United Kingdom - 2008-2009 I was the founder of a web hosting company called MiloFi Hosting. It was then acquired by a larger web hosting company.</p>
Education	<p>University of East Anglia; Norwich, Norfolk - 2011-2015 MComp Computing Science (1.1 expected). Units completed include Software Engineering, Database Systems, Computer Graphics and Distributed Computing.</p> <p>Thomas Rotherham College; Rotherham, South Yorkshire - 2009-2011 A Levels - Business Studies (A*), Economics (A), Maths (B)</p> <p>Wingfield Academy; Rotherham, South Yorkshire - 2004-2009 GCSE - 10 GCSEs A* - C (including Maths and English Language)</p>
Skills	I am familiar with PHP, Java, Objective-C and C++. I have worked with both the Android and iOS SDKs. I also have a working knowledge of HTML & CSS, but design is not my main area.
